## What it is...

**INFILLCRETE™ SYSTEM**, is a state of the art, 2-part polymeric material that water and moisture proofs basements. It is environmentally friendly with no solvents or VOCs. Originally developed for difficult waterproofing and heavy industrial applications, it has successfully been used by a variety of industries including Fortune 50 companies. This proven, revolutionary product is now available for commercial and residential installation by trained professionals.

Berlin, CT.

After

Berlin, CT.

## How it works...

**INFILLCRETE™** seeks water and penetrates deep within cementitious substrates thanks to its hydroscopic properties. It then reacts with moisture to create a strong, protective compound that waterproofs basement slabs and walls from the inside out maintaining the ongoing strength and integrity of the concrete. Unlike other products, INFILLCRETE will not delaminate or lose adhesion with concrete wall or slab.

Mystic, CT.

## Why INFILLCRETE™ is better...

- ▶ Cost effective.
- ▶ Non-invasive.
- ▶ Environmentally friendly – green product technology.
- ▶ Does not contain solvents or Vocs.
- ▶ Time saving – most applications are completed in one day.
- ▶ Applied to concrete basement walls and concrete basement floors.
- ▶ Eliminates water, humidity, efflorescence mildew & may even reduce radon!
- ▶ Creates a vapor barrier that eliminates basement moisture.

**INFILLCRETE IS FOR PROFESSIONAL USE  
- FOR TRAINED INSTALLERS ONLY! -**
